

Nationally Accredited Medicines Management Skills Training

A Blended Learning Programme

Knowledge

All registered candidates will be provided with access to the e-Learning Environment (Moodle)

Pharmacy Technicians must be able to demonstrate knowledge and understanding of the modules they are completing as well as competence in the practice activities undertaken in the workplace. They are also required to maintain an e-portfolio of evidence to support their competence and completion of the module.

Knowledge for this scheme is delivered and assessed via the e-learning environment and other external e-Learning providers.

e-Learning module: “One Stop Dispensing”

This module consists of e-learning slides, case studies and a quiz and will provide the candidate with valuable knowledge of “One Stop Dispensing”. All components must be completed and the quiz summary sheet printed out and placed in the portfolio
